

CES Transactions on Electrical Machines and Systems

December 2022 Volume 6 Number 4 (ISSN 2096-3564)

Content

341 Message from Editors

Special Section on Electrical Machines and Systems in New Energy Applications

343 Investigation of Optimal Split Ratio of 6-Slot/2-pole High Speed Permanent Magnet Motor with Toroidal Winding *F. Xu, T. R. He, Z. Q. Zhu, H. Bin, D. Wu, L. M. Gong, J. T. Chen*

352 Multi-objective Hierarchical Optimization of Interior Permanent Magnet Synchronous Machines Based on Rotor Surface Modification *R. Xu, W. M. Tong*

359 Optimal Designs of Wound Field Switched Flux Machines with Different DC Windings Configurations *W. T. Wang, Y. K. Wang, E. L. Ma, L. J. Wu*

368 Electromagnetic-thermal Coupled Analyses and Joint Optimisation of Electrically-excited Flux-switching Linear Machines *H. Wen, Y. F. Wang, Y. T. Zheng, W. Zeng, X. Qu, J. J. Cai*

378 Sensorless Control of Permanent Magnet Synchronous Motor Based on New Sliding Mode Observer with Single Resistor Current Reconstruction *Q. G. Sun, X. L. Zhu, F. Niu*

384 An Enhanced Sensorless Control Scheme for PMSM Drives Considering Self-inductance Asymmetry *L. J. Wu, Z. K. Lyu, Z. K. Chen, J. M. Liu, Y. Lu*

393 Two-vector Dimensionless Model Predictive Control of PMSM Drives Based on Fuzzy Decision Making *N. Farah, G. Lei, J. G. Zhu, Y. G. Guo*

404 Research on Control Strategy of Grid-connected Brushless Doubly-fed Wind Power System Based on Virtual Synchronous Generator Control *S. Liang, S. Jin, L. Shi*

Regular Paper

413 Modeling of Fault-tolerant Flux-switching Permanent-magnet Machines for Predicting Magnetic and Armature Reaction Fields *Y. Fang, J. H. Ji, W. X. Zhao*

422 Electromagnetic Performance Prediction for the Symmetrical Dual Three-phase Surface-mounted PMSM under Open-phase Faults Based on Accurate Subdomain Model *Z. Liang, D. L. Liang, P. Kou, S. F. Jia*

438 Three-dimensional Analytical Modeling of Axial Flux Permanent Magnets Maglev Motor *W. Qin, G. Lv, Y. H. Ma*

445 Research on Slot-pole Combination in High-power Direct-drive PM Vernier Generator for Fractional Frequency Transmission System *Z. D. Yuan, S. F. Jia, D. L. Liang, X. L. Wang, Y. Yang*

454 Optimal Pole Ratio of Spoke-type Permanent Magnet Vernier Machines for Direct-drive Applications

..... *Y. Zhao, D. W. Li, X. Ren, R. H. Qu, J. B. Sun, P. Yu*

465 Zero-sequence Current Suppressing Strategy for Dual Three-phase Permanent Magnet Synchronous
Machines Connected with Single Neutral Point..... *Z. W. Li, Y. X. Du, J. H. Ji, T. Tao, W. X. Zhao*
